

H/JAB

'JABSCO FIP PUMP SEALS'

SPECIFICATION SHEET

Type A

Type B

Type C

Type D

Type E

► Various Mechanical Seals
► Suits Jabsco (Xylem) Pumps

H/JAB covers a range of mechanical seals replacing those fitted to older Jabsco pumps, particularly flexible-impeller (FIP) ranges.

Various seal types are available depending on the OEM part number. Where part number represent a kit, only the mechanical seal is supplied.

Type A is an enclosed, compact bellows seal and is the most common.

Type B is a Jabsco-specific bronze, press-fitted stationary seal with internal shaft-sealing rotary.

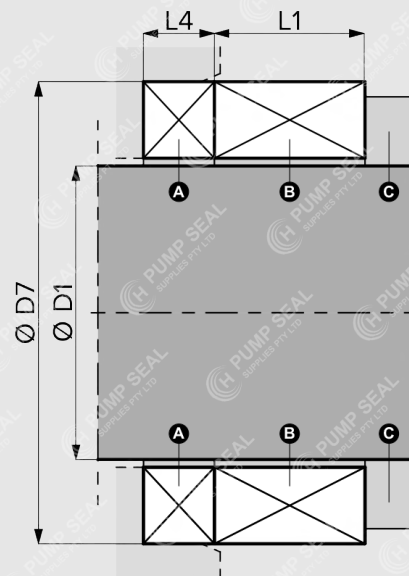

Type C is a compact rubber bellows seal, commonly fitted to Jabsco 515xx Series pumps.

Type D is a common single-spring diaphragm seal.

Type E is an encapsulated rubber "boot" seal, commonly fitted to Jabsco 150xx Series pumps
