

H6KB

'HIDROSTAL - TYPE M - SEALS' SPECIFICATION SHEET

- ▶ Suits Hidrostal pumps
- ▶ Replaces Type "M" seals
- ▶ Internal-spring, rubber encased

H6KB replaces the Type "M" seal codes in Hidrostal pumps. Typically used in the product-side position in the tandem seal arrangement.

The TC/SiC face combination ensures no molecular welding can occur. Springs are completely encased in a rubber boot to avoid fouling by stringy materials

EQUIVALENT

Type 68
