

## HGGD

'H/GRU/190525'

## SPECIFICATION SHEET

- ▶ **Shaft seal only**
- ▶ **Suits CR 30/60 pumps**
- ▶ **Unbalanced, O-ring mounted**
- ▶ **Rigid torque transmission**

Robust o-ring seal feature a rigid torque transmission design required for hard material pairings (WC/WC or SiC/SiC), even where lubrication is poor.

The dynamic secondary seal is an O-ring. This involves a risk of wear on the shaft under the O-ring and of seal hang-up (blocking of axial movement of the rotating seal ring).

▶ **Material codes**

AUUE  
AUUV  
AUUE/V  
AUUK  
AUBK

**INCLUDED PARTS**

Rotary Collar  
Rotary O-ring  
Rotary Face  
Spring  
Spring Drive Collar  
Drive Collar Grub Screws  
Stationary  
Stationary O-ring

**EQUIVALENT**

Type A

**PUMP COMPATIBILITY**

Replaces the (pos. 105) shaft seal in:

**CR / CRI / CRN / CRT / CRK / CRKI 30/60**
