

HGSD

'H/GRU/190521'

SPECIFICATION SHEET

- ▶ **Shaft seal only**
- ▶ **Suits CH 2/4 pumps**
- ▶ **Unbalanced, O-ring mounted**
- ▶ **Rigid torque transmission**

Robust o-ring seal feature a rigid torque transmission design required for hard material pairings (WC/WC or SiC/SiC), even where lubrication is poor.

The dynamic secondary seal is an O-ring. This involves a risk of wear on the shaft under the O-ring and of seal hang-up (blocking of axial movement of the rotating seal ring).

INCLUDED PARTS

Rotary Collar
 Rotary O-ring
 Rotary Face
 Spring
 Spring Cap
 Stationary
 Stationary O-ring

EQUIVALENT

Type A

PUMP COMPATIBILITY

Replaces the (pos. 105) shaft seal in:

CH / CHV / CHN 2/4
