

P.S. TEMPLUBE

TEMPORARY RUBBER LUBRICANT EMULSION

For installation of elastomeric mechanical seals:

P.S. TEMPLUBE is a water-based product specially formulated to provide temporary lubrication of mechanical seal elastomers, allowing for quick and easy installation. Unlike silicone or PTFE lubricant's, P.S. TEMPLUBE evaporates, allowing the elastomer to grip the shaft or bore which locks the seal in place.

Food-grade, safe for Incidental Food Contact (IFC)

USAGE INSTRUCTIONS

- ▶ Using a clean pair of gloves free from any dirt or debris, apply a thin film of lubricant to the following areas:
 - shaft end and shaft sealing area
 - internal diameter of seal rotary (bellows or diaphragm)
 - outer diameter of seal stationary (boot or o-ring)
 - stationary housing / bore
- ▶ Depending on the pump configuration, locate the stationary and rotary into the correct position.
- ▶ Drying time is approximately **20 minutes**.
- ▶ Once evaporation takes place, lubricity is gone and seal is locked in place.

TECHNICAL DATA

| Description | Food-grade synthetic esters emulsified in water |
|--------------------------|--|
| Contains | Methylated Spirits |
| Appearance | Clear |
| Odor | Mild |
| Estimated dry time | 20 minutes |
| Biodegradeable | Yes |
| Sprayable | Yes |
| Flammable | Yes |
| % Reduction in friction | ~70% |
| pH | 8.7 |
| Freezing point | 0.0 |
| Flash point | None |
| Storage temperature | 2°C - 30°C |
| Specific gravity | 0.98 |
| Environmental compliance | FDA 21 CFR 178.3570; NSF-Registered H1 lubricant; Complies with RoHS and REACH (SCHC: none). Cobalt-free; Conflict mineral-free |
| Prop 65 | Exempt |
| % VOC by Volume | 1% |

For Mechanical Seal III

Water-based formula
Safe for Incidental Food Contact II
Contains Methylated Spirits

First-aid measures:

Following inhalation - if breathing is irregular or stopped, immediately seek medical assistance and start first aid actions. Provide fresh air.

Following skin contact - wash with plenty of soap and water $% \left(1\right) =\left(1\right) \left(1\right)$

Following ingestion - rinse mouth with water (only if the person is conscious). Do NOT induce vomitting $\,$
